

Canine Olfaction Science and Law: Advances in Forensic Science, Medicine, Conservation, and Environmental Remediation

Table of Contents

ANATOMY, GENETICS, NEUROLOGY, DISEASE, AND EVOLUTION

The Anatomy of the Canine Nose

David Bainbridge

Evolution of the Nose

Embryonic Development of the Nose

Skeleton of the Muzzle

Nasal Planum, Cartilages, and Muscles

Vestibule and Vomeronasal Organ

Nasal Cavities and Paranasal Sinuses

Olfactory Receptor Cells and Their Connections to the Brain

Wiring of the Olfactory System and the Functional Role of Neurons and Glia during Lifelong Turnover

Konstantin Wewetzer and Gudrun Brandes

Cellular Constituents of the Olfactory System

Functional Role of Olfactory Sensory Neurons and Olfactory Ensheathing Cells during Lifelong Neural Turnover

Lessons from the Olfactory System for the Treatment of Canine and Human Central Nervous System Injury

Olfaction and the Canine Brain

Marcello Siniscalchi

Functional Magnetic Resonance Imaging

Pathways of Olfactory Stimulation to the Canine Brain

Hemispheric Specialization and Olfaction in Dogs

Olfactory Cues in Social Behavior

Conclusions

Genetics of Canine Olfaction

Pascale Quignon and Francis Galibert

Olfactory Systems

Odorant Receptors

The Dog's OR Repertoire

Dog Olfaction and Its Practical Applications

Conclusion

Endnotes

Effects of Disease on Canine Olfaction

Cynthia M. Otto

Diagnosis of Olfactory Dysfunction

Causes of Olfactory Dysfunction

Conclusions

Olfaction in Wild Canids and Russian Canid Hybrids

Nathaniel J. Hall, Alexandra Protopopova, and Clive D.L. Wynne

The Function of the Canine Nose

Is Wild Canid Olfaction Better?

Conclusions

Endnotes

CHEMISTRY AND AERODYNAMICS OF ODORS

The Development of Gas Chromatography/Mass Spectrometry and Its Uses in Odor Analysis

Joanna Rudnicka and Bogusław Buszewski

Beginnings of Gas Chromatography

The Gas Chromatograph

Mass Spectrometry

Combining Two-Dimensional Gas Chromatography with Time-of-Flight Mass Spectrometry (GC x GC-TOF/MS)

Applications of Gas Chromatography/Mass Spectrometry

Conclusions

Aerodynamics of Odor Plumes and Odor Plume Structures in Different Habitats

Paul A. Moore

Importance of Scale

Physical Constraints on Odor Transmission in Air

Summary of the Physical Constraints to Odor Dispersion

Odor Landscapes at Varying Scales

Searching Odor Landscapes: Environment-Specific Odor Fields

Summary

The Practical and Legal Significance of the Chemical Analysis of Odor in Relation to Canine Forensic and Judicial Evidence

John Ensminger and Megan A. Ferguson

Volatile Organic Compounds and the Odor of Human Cadavers

Search for the Human Decomposition Profile

Relating Analytically Determined Decomposition Profiles to Canine Scent Alerts

Cocaine on Currency

Conclusion

Endnotes

BEHAVIOR, LEARNING, AND TRAINING

Canine Olfactory Learning and Behavior

Nathaniel J. Hall and Clive D.L. Wynne

Classical (Pavlovian) Conditioning

Operant Conditioning

Delivery of the Reinforcer

Stimulus Control

Simple Odor Mixtures

Complex Stimulus Control

Conditional Discrimination: The Dual Function Dog

Memory
Conclusion and Future Directions
Endnotes

Training Considerations in Wildlife Detection

Aimee Hurt, Deborah A. (Smith) Woollett, and Megan Parker

Dog Selection
Handler Selection
Passive Final Response
Training Samples
Transition to Naturally Occurring Targets
Responsibilities of the Handler
Nontarget Issues
Maintaining Target Fidelity in the Field
Conclusion
Endnote

Training Fundamentals and the Selection of Dogs and Personnel for Detection Work

Sherri Minhinnick, L.E. Papet, Carol M. Stephenson, and Mark R. Stephenson

Is Training an Art or a Science?
Axioms of Canine Training
Anthropomorphism as a Confounder
Actions and Intonations of Cueing
Selecting Dogs for Olfaction Responsibilities
Selection and Appointment of a Handler
Selection of a Trainer or a Vendor
Summary
Endnote

Training a Statistically Superior Scent Discrimination Canine: Where Trainer Wisdom Meets Scientific Validation

L.E. Papet and Sherri Minhinnick

Acclimation
Markers as Rewards, Reinforcers, Motivators, and Commands
Preconditioning and Initial Odor Recognition Training
Training for Reliability
Summary

Statistical Reliability Confounders and Improvement in Advanced Dog Training: Patterns, Routines, Targets, Alerts, Distractors, Reinforcement, and Other Issues

Sherri Minhinnick

Independent Sniffing and Patterning During Search Routines
Types of Alerts and Indications
Distractors, Detection to Discrimination
Continuous Improvement Is Mandatory
Summary

USES IN FORENSICS AND LAW

Canine Drug-Detection Evidence: Admissibility, Canine Qualifications, and Investigative

Practices

Leslie A. Shoebottom

Background and Canine Sniff Doctrine

Canine Sniffs of Vehicles

Canine Sniffs of Homes

Detection Dog Certification, Training, and Field Performance Records

Determining Canine Reliability for Contraband Detection

Canine-Reliability Determinations after *Harris*

Types of Canine-Reliability Evidence Submitted

Daubert Challenges to Canine Sniff Evidence after *Harris*

Retirement of Marijuana-Trained Detection Dogs in States Where Marijuana Possession and Use Has Been Decriminalizing

Canine Sniff of a Person

Acknowledgment

Endnotes

Cadaver Detection in Forensic Anthropology and Criminology: An Overview with Personal Notes

Keith P. Jacobi

History behind Forensic Anthropology and Cadaver Dogs

Search for Remains and Reliability of Cadaver Dogs

Locating Antiquated Buried Human Bone

Cadaver Dog and Scent of Burned or Cremated Human Bone

Positive and Negative: Judicial Cases with Cadaver Dogs

Cadaver Dogs and Detection of Human Remains in Water

Future Directions

Endnotes

Detection of Cocaine on Currency

Thomas H. Jourdan

U.S. v. \$30,060

U.S. v. \$215,300

Cocaine on Currency

Interpretation of the Level of Drugs on Currency

Summary

Endnotes

Narcotic and Explosive Odors: Volatile Organic Compounds as Training Aids for Olfactory Detection

L.E. Papet

Types of Materials

Contamination Types and Causes

Odor Concentration, Availability, and Attributes

Odor Aid Usage in Training and Deployment

Summary

Scent Lineups: Variables in Procedures and Statistical Verification

Tadeusz Jezierski

Individual Odor Theory

Rationale for Identification by Scent Lineup for Forensic Purposes

Different Scent for Different Body Parts
Evaluation of Indications and Validity of Canine Identification
Validity of Scent Lineups
Preferred Scented Items for Lineups
Attractiveness
Familiarity and Gender
Time Factor in Scent Recognition
Cosmetics and Smoking
Control Trials
Number of Stations and Target Samples
Control and "Zero" Trials
Effect of Increasing the Number of Dogs Used
Clever Hans Effect
Location of Target Samples in Lineups
Abilities of Individual Dogs
Other Uses of Canine Lineups
Conclusion

How US Courts Deal with the "Black Box" of Canine Scent Identification

John Ensminger

Development of Foundational Requirements for Tracking Evidence
Scent Lineups
Scent Transfer Units
Courts Begin to Question Validity of Scent Lineups
How Do Courts Deal with the "Black Box"?
Endnotes

USES IN CONSERVATION AND REMEDIATION

Trained Dogs in Insect Detection

Margie P. Lehnert and Emma N.I. Weeks

Beneficial Insects
Harmful Insects
Difficulties with Detecting Insects
Advantages of Canine Insect Scent Detection
Early History of Canine Insect Scent Detection
Efficacy of Canine Detection for Insect Surveillance
False–Positive Indications
Training Dogs with Live Insects
Alternatives to Live Insects for Training
Efficacy of Alternatives to Live Insects for Training Purposes
Applied Canine Insect Scent Detection
Conclusion

Detection Dogs in Strategies for Eradicating Pest Species from Natural Environments

Keith Springer

Macquarie Island
New Zealand Department of Conservation Pest Detection Dog Program
Conclusion
Endnotes

Canine Biodetection in Conservation, Eradication, and Border Protection: A Regulatory Perspective

John Ensminger

Conservation

Use of Detection Dogs

Regulatory Requirements for Arctic Surveys

Habitat Fragmentation

Identification of Individual Tigers

Detection of Disease in Wildlife

Vultures, Poisons, and Pollutants

Eradication

Summary

Acknowledgment

Endnotes

USES IN DETECTION OF DISEASES AND MEDICAL CONDITIONS

Detection of Human Cancer by Dogs

Tadeusz Jezierski

Malignant Melanoma

Lung Cancer

Breast Cancer

Prostate Cancer

Bladder Cancer

Ovarian Cancer

Colorectal Cancer

State of Research and Prospects for Clinical Application

Methodology Issues

Conclusions

Endnote

Medical Alerting to Seizures, Glycemic Changes, and Migraines: Significance of Untrained Behaviors in Service Dogs

John Ensminger

Americans with Disabilities Act

Seizure Alerting

Hyperglycemia and Hypoglycemia Alerting

Migraine Alerting

Legal Status of Spontaneously Alerting Dogs

Need for Further Research

Endnotes
